

Liberty

Library Link Mobile Application

Softlink

The Library Link mobile app is specifically designed for use on mobile phones and small mobile devices, it is not required for tablets/iPads.

With Library link you can...

- Search for available resources
- Check your alert messages
- View current Loans and Reserves
- View library information such as location and opening hours
- Scan ISBNs or barcodes to automatically retrieve resources from the system
- View the library's latest resources (New Items)
- View available and checked out resources at a glance
- Place a reservation
- Identify editions and titles easily with cover images
- Tap on the title to view detailed information

The Library Link app is free and available from iTunes and Google Play Store.

Requirements

To link the application with your Liberty system, you will need to purchase a Web Services API module from Softlink.

Web Services API supports the integration of a range of applications with Liberty, including web portals such as Moodle, Share-Point and SiteMinder, organisational systems such as Finance and HR applications, and federated search modules such as EBSCOhost and Serials Solutions 360 Search.

Library Link is available for Liberty Version 5 Build 4 and above. It is compatible with Apple devices (requires iOS 4.0 or later) and Android devices (requires Android 2.2 'Froyo' or higher).
